Fire Protection

Organisations need to preserve sensitive documents—sometimes for years. Fichet's Celsia safes guarantee the adequate level of protection thanks to Mirium, our latest patented composite barrier material from in-house R&D.

Key features

PROTECTION

✦ Certified fire resistance as per EN 1047-1 (Grade S 60 P or 120 P, i.e. 1 or 2 hours for paper documents)
CAPACITY

✦ 200 litres

✦ 400 litres

✦ 800 litres

KEY BENEFITS

✦ High level of fire resistance to protect your sensitive paper documents (up to 2 hours).

✦ Wide choice of locking and storage capacity options to adapt to your needs.

Fichet-Bauche guarantees

Our products are subjected to the most stringent tests approved by insurers and A2P-certified by France's National Centre for Prevention and Protection (CNPP). This is the result of integrating our own test laboratory into our factory to impose conditions going even further than those of certifying bodies. Installation is also carried out by our own technicians to ensure certification of your safe is always preserved.

A hallmark of our brand

With 200 years of experience as master locksmiths, we develop and manufacture our own exclusive locks. This is one of the key strengths of our safes and a guarantee of high security. We remain committed to permanent investment in R&D, always looking for more functionality, more resistance, new materials and more advanced lock technologies.

Product details

Available in three sizes with 200, 400 or 800 litres of storage capacity, Celsia cabinets protect your paper documents from any potential fire and can also preserve your data media thanks to its optional internal compartment with Grade S 120 DIS certification.

PERFORMANCE AND SECURITY

Celsia cabinets are equipped with the most recent fireproof technology designed and developed by Fichet-Bauche laboratories. Thanks to exclusive materials, clever design of joints and one-piece construction, they can guarantee stable levels of temperature to safely preserve your sensitive documents.

✤ Fichet's patented Mirium composite barrier material provides efficient thermal insulation. Thanks to its reinforced cellular structure, this material preserves outstanding mechanical integrity in the event of an impact or fall.

✤ Multiple layers of seals also provide an effective barrier to flames, hot gases, dust and moisture.

✤ Galvanised steel construction protects against corrosion.

INTERIOR FITTINGS AND OPTIONS

✤ Adjustable shelf for hanging suspension files

✤ Sliding tray

✤ Telescopic file frame (front/side loading)

✤ Grade 120 DIS fireproof compartment for sensitive data media
