

# EXPOPROTECTION: FICHET INNOVATES

FROM SIMPLY NECESSARY TO  
VALUE-CREATING SECURITY

## Pavilion 5.2 | Stand E49

---

The ExpoProtection professional fair held in Paris (September 28-30, 2021) will showcase Fichet Group's capacity to mobilize expertise and creativity to offer innovative concepts to its clients  
—taking full advantage of new technologies to create safer living for everyone.

## FRENCH EXPERTISE IN THE SERVICE OF PROTECTING HIGH-RISK SITES

Security is now a strategic factor in the creation of added value for all organizations. With its threefold expertise in building protection, secure storage of valuables and electronic security, Fichet designs certified active and passive security solutions enabling its clients to operate safely in a world of ever-changing physical and cyber risks.

Fichet Group's manufacturing capacity rests on two company-owned production sites in France. This local implantation reflects our commitment to preserve an innovative and attractive industrial fabric in our home country. Thanks to these technologically advanced infrastructures, Fichet Group maintains full control over all processes – from product design to serial production – in compliance with ISO 9001, ISO 14001 and ISO 45001 standards.

## SECURITY DOORS AND PARTITIONS AT THE HEART OF SAFE BUILDINGS

Fichet is France's leading manufacturer of security doors, windows and walls. Partnerships with state security – army, police and Gendarmerie services – have allowed our Group to design new products answering the diversity of threats and modes of operation.

### DorTek security doors: upgraded resistance to answer combined risks

This range of armor-plated security doors with full panels or infills offers certified ballistic resistance up to the highest levels (grade FB7). A tailor-made solution that can be combined with other type of protection, e.g. break-in resistance.

### BlasTek and DarTek partitions for multi-resistance against new levels of threat

Fichet has developed both these ranges of security doors and partitions to combine superior blast resistance against car bombs, kamikaze attacks or industrial accidents together with higher break-in resistance and ballistic protection against military-grade weapons (e.g. Kalashnikovs).

### Hygiaphone: the reference brand for mutual protection of staff and visitors

Hygiaphone products prevent the spread of germs and other pathogens without limiting the quality of verbal exchanges at your reception desks. They offer the most extensive range on the market: sliding trays, front-opening counters, paypoint windows and intercom systems—also including break-in, ballistic and fire resistance.

## ELECTRONIC SECURITY: A MUST COMPONENT FOR PASSIVE PROTECTION AND SEAMLESS SECURITY

Also a reference provider in the field of electronic security systems integration, Fichet offers solutions for environment monitoring, early detection of suspicious activity and qualification of risk situations in order to allow operators to anticipate and react efficiently. Widely acknowledged for their ergonomics, these site-supervision solutions integrate CCTV, intrusion detection and access control systems to interact with all devices protecting your buildings.

## COM'IN: AN EXCLUSIVE NEW PRODUCT UNVEILED AT EXPOPROTECTION

### Simplified and fully secure management of visitors

Fichet is about to launch its new **Com'in** module for simplified management of all visitor processing operations—total friendliness preserving compliance with site security constraints. **Com'in** takes advantage of the most recent web-based technologies and can be implemented both with cloud and local hosting on your premises. Its visitor terminal is also 100% "touchless". This solution allows you to anticipate visits, plan ahead for necessary resources and even adapt them automatically to peak times. Monitoring of visitors occurs in real time and provides clear reporting with explicit indicators and alerts.

## FIRE-RESISTANT SAFES AND CABINETS

A leader in safe storage solutions, Fichet has acquired more than 200 years of expertise through the long history of Fichet-Bauche. This flagship brand offers physical protection solutions against unauthorized access, fire and theft. We design, manufacture and install a full range of safes, fire-resistant cabinets and vaults. All products are certified in accordance with the most stringent European standards.

### InviKtus: unique safes with threefold protection against theft, fire and explosives (Grade VI A2p certification)

InviKtus safes were designed to meet the highest expectations of professionals. They combine the latest innovations to keep abreast of changing risks while preserving practical features: optimized storage space with a stunning reduction in weight—10 to 20%.

"Our market is becoming more and more complex—with ever higher expectations. Our choice is to position ourselves prominently as a manufacturer and to invest heavily in R&D and innovation. Our ambition is to become Europe's reference medium-size company for this market."

Julien Laforets,  
President of Fichet Group

## ABOUT FICHET

Fichet Group is France's leading supplier of equipment, services and IT-ecosystems dedicated to the security of private organizations and government institutions against all types of risks—from basic to extreme.

Fichet designs gradual protection environments based on the complementarity of resources to protect the personnel, data and material assets of its clients.

Fichet Group operates in France (with 14 local branches and 2 production sites), Belgium and Luxembourg. It also exports internationally.
