MILLIUM DTM

Cash Deposit & Transfer Safe

Millium DTM delivers a specific deposit and transfer system designed to secure cash exchanges between retail outlets and their CIT service providers. It ensures fully safe pickup of banknotes as well as provision of coin floats.

Key features

PROTECTION

- ✦ Certified burglary resistance as per EN 1143-2 (Grades I-III)

CAPACITY

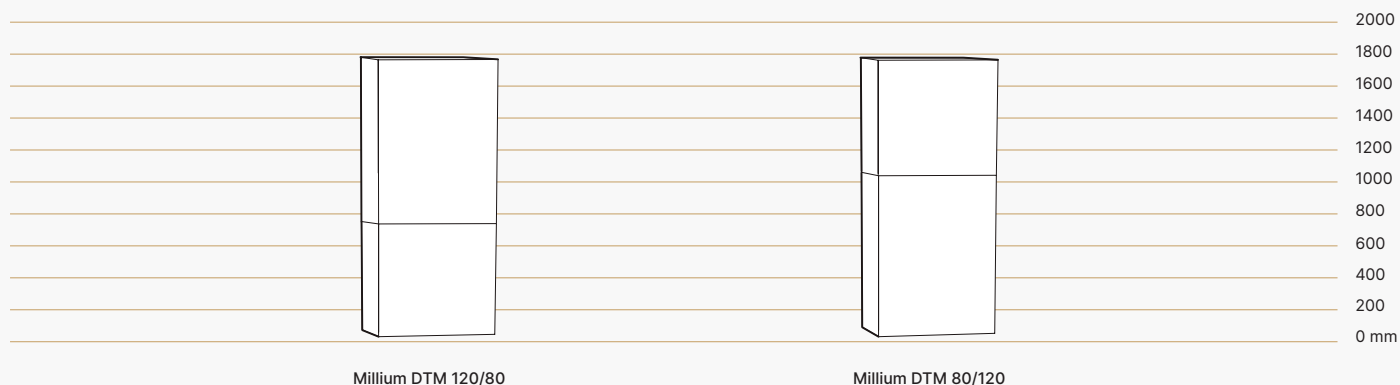

- ✦ 80/120 litres
- ✦ 120/80 litres

KEY BENEFITS

- ✦ A single product for secure storage of daily takings and efficient interfacing with CIT services
- ✦ Based on the long-tested Millium range for superior levels of burglary resistance

Fichet-Bauche guarantees

Our products are subjected to the most stringent tests approved by insurers and A2P-certified by France's National Centre for Prevention and Protection (CNPP). This is the result of integrating our own test laboratory into our factory to impose conditions going even further than those of certifying bodies. Installation is also carried out by our own technicians to ensure certification of your safe is always preserved.

A hallmark of our brand

With 200 years of experience as master locksmiths, we develop and manufacture our own exclusive locks. This is one of the key strengths of our safes and a guarantee of high security. We remain committed to permanent investment in R&D, always looking for more functionality, more resistance, new materials and more advanced lock technologies.

Product details

DTM is an “all-in-one” certified solution for efficient management of deposits, transfers and floats.

Deposits are performed via the deposit head of a Millium DFX safe. This allows staff to proceed with fully safe and irreversible deposit of takings in special envelopes.

Transfers are ensured via the Millium DFX safe. Its door opens on the outside to allow CIT teams to perform pickups directly at street level.

Floats are recharged via a feeding hatch between the transfer safe and a standard Millium safe. CIT teams can thus deliver your cash orders into the Millium safe whose door opens on the inside of the retail outlet. For security reasons, no direct access is possible between the two safes.

PERFORMANCE AND SECURITY

Millium DTM offers burglary resistance as per EN 1143-2 certified by A2P (Grades I-III with €25,000 to €55,000 insurance ratings).

Millium DTM can be configured for direct CIT access from the outside street or as a protected airlock.

In this case, access is protected by a security trap door with a European cylinder lock or an outside security rolling shutter.

- ✦ DOCT alarm kit detection sensors for both “basic risk” and “high risk” configurations are available as an option.

INTERIOR FITTINGS AND OPTIONS

- ✦ Bay frame
- ✦ Reinforced shelves
- ✦ Alarm kit
- ✦ Anchoring kit included for safes weighing less than 1,000 kg (mandatory as per EN 1143-2 requirements)
