MC4

Mechanical Combination Lock

MC4 combination locks are patented and were specifically developed by our R&D teams. MC4 and Moneo locks share the same locking principle but MC4 models rely on 4 dials instead of only 7.

PERFORMANCE AND SECURITY

- ✦ 4 dials with 28,000 possible codes
- ✦ Designed to equip standard risk safes and security cabinets, this lock is Grade-A certified as per EN 1300 by A2P.
Fitting MC4 locks on your safe will deliver optimum protection for your valuables.
- ✦ Automatic code scrambling on closure
- ✦ Code search impossible without the help of a technician
- ✦ Allows for joint fitting with a second lock (mandatory on safes for all mechanical combination locks)
- ✦ Tried-and-tested and easy to use
- ✦ Each dial is independent, which allows for correcting input errors without affecting other dials (no need to reset to 0)

A2P certification grades (safes)	Grade I-III	Grade IV & V	Grade VI+
Number and types of locks	1 MxB/B + 1 MC4	-	-
